SUBJECT: DISTRIBUTED DATABASE SYSTEMS (606)

LAB 2

Q1. Write a PL/SQL block to find the sum of two numbers.

Code:

```
DECLARE
  a NUMBER := 10;
  b NUMBER := 20;
  sum NUMBER;
BEGIN
  sum := a + b;
  DBMS_OUTPUT.PUT_LINE('Sum = ' || sum);
END;
```

Q2. Write a PL/SQL block to update total sal for empno 100.

Eno, ename, bp, da, hra, total.

Code:

```
DECLARE
  v_bp NUMBER;
  v_da NUMBER;
  v_hra NUMBER;
  v_total NUMBER;
BEGIN
  SELECT bp, da, hra INTO v_bp, v_da, v_hra
  FROM employee
  WHERE eno = 100;

  v_total := v_bp + v_da + v_hra;

  UPDATE employee
  SET total = v_total
  WHERE eno = 100;

  DBMS_OUTPUT.PUT_LINE('Total salary updated for Empno 100 = ' || v_total);
END;
```

Q3. Write a PL/SQL block to find the larger of two numbers.

Code:

```
DECLARE
  a NUMBER := 45;
  b NUMBER := 67;
BEGIN
  IF a > b THEN
    DBMS_OUTPUT.PUT_LINE('Larger = ' || a);
```

```

ELSE
    DBMS_OUTPUT.PUT_LINE('Larger = ' || b);
END IF;
END;

```

Q4. Write a PL/SQL block to find the greatest of the two numbers.

Code:

```

DECLARE
    a NUMBER := 1;
    b NUMBER := 5;
    c NUMBER := 90;
    greatest NUMBER;
BEGIN
    IF a > b AND a > c THEN
        DBMS_OUTPUT.PUT_LINE('Greatest = ' || a);
    ELSIF b > c THEN
        DBMS_OUTPUT.PUT_LINE('Greatest = ' || b);
    ELSE
        DBMS_OUTPUT.PUT_LINE('Greatest = ' || c);
    END IF;
END;

```

Q5. Write a PL/SQL block to calculate fine for rno 100.

Rno, bookno, doi, dor, fine

Fine is Rs 1 if days<7

Fine is Rs 2 if days<14 and >7

Fine is Rs 3 if days>14

Amount mentioned for each day.

Code:

```

DECLARE
    v_doi DATE;
    v_dor DATE;
    v_days NUMBER;
    v_fine NUMBER := 0;
BEGIN
    SELECT doi, dor INTO v_doi, v_dor
    FROM library
    WHERE rno = 100;

    v_days := dor - doi;

    IF v_days < 7 THEN
        v_fine := v_days * 1;
    ELSIF v_days >= 7 AND v_days < 14 THEN
        v_fine := v_days * 2;
    ELSE
        v_fine := v_days * 3;
    END IF;

    DBMS_OUTPUT.PUT_LINE('Fine = Rs ' || v_fine);
END;

```

Q6. Write a PL/SQL block to generate multiplication table for 3 to n.

Code:

```
DECLARE
  n NUMBER := 8;
  i NUMBER;
  j NUMBER;
BEGIN
  FOR i IN 3..n LOOP
    DBMS_OUTPUT.PUT_LINE('Table of ' || i);
    FOR j IN 1..10 LOOP
      DBMS_OUTPUT.PUT_LINE(i || ' x ' || j || ' = ' || (i*j));
    END LOOP;
    DBMS_OUTPUT.PUT_LINE('-----');
  END LOOP;
END;
```
